STAY CONNECT, STAY SMART

With IFM fleet management system that makes your Fleet stay connected and stay smart, delivering all the information you may need to optimize your cleaning tasks and reduce the total cost.

The digitalization puts you in contact with your Gadlee fleet, it collects all the fleet data and let you know position, usage, performances, environmental footprint for each machine, the whole fleet, per job site or work shift. With IFM everything is under your control. You can have a complete overview of the service provided and find out the improvements that can be made, basing your considerations on real data.

MULTI-CLEANING MODES SUIT FOR ANY SITUATION

SMART KEY CONTROL SYSTEM

Equip with Smart Key control system,
CLEAN+DRY+SOLUTION functions active automatically.

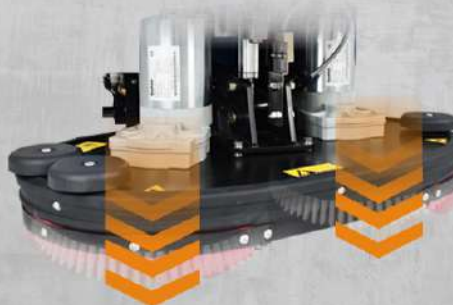

POWER BOOST MODE

Equip with Power Boost Mode ,
Brush pressure provide up to maximum 65kg*, ensure best cleaning performance even for tough dirt.

Brush pressure provide up to maximum 65kg

65
kg

ECO MODE

Equip with ECO MODE to ensure maximum quite and extend running time up to 6.5 h*.

LOW NOISE

With ECO Mode technology,
it is extremely quiet, which
benefits many places.

LITHIUM-ION POWER AND MANAGEMENT

No maintenance, keep high performance everywhen.

EDS CHEMICAL DOSE SYSTEM

Detergent quick change design avoids waste water;
3 dilution setting available for different application;
Water and detergent mix perfectly for increase cleaning performance.

*Test data from Gadlee R&D Dept

EASY CONTROL IN ANY OPERATION

Easy to control with self-explanatory symbols, clear control panel,
and colour-coded control elements;

New user experience: control panel for ergonomic design and clear
vision for control.

SAFE AND RELIABLE, PROVIDE MAXIMUM PROTECTION

ROBUST & SAFETY

The body is made of LLDPE for strength without compromising durability.

GREATER CONTROL DURING INTERVENTIONS SAFETY STANDARDS

Cruise
Control

E-Brake

CRUISE CONTROL

Control device letting the operator
set the required speed.

E-BRAKE

Automatically operated when release the switch, and the machine
stops, as it works as safety E-Brake immediately.

Technical Data

B70

CLEANING SYSTEM

Cleaning path	700mm
Squeegee width	970mm
Number of brush	2 discs
Solution tank	85L
Recovery tank	95L
Maximum running time	4-5h (5.5-6.5h @ECO)
Productivity theoretical max	2450m²/h
Power supply	24V DC
Maximum climbing capacity	2%

MACHINE SPECIFICATIONS

Weight (Without Batteries)	142kg
Dimensions	
Length	1430mm
Width	830 mm
Height	1075mm

*Test data from Gadlee R&D Dept
